It is acknowledged that all Urban Fires products create the most realistic flames. Our Signature gas burners are state-of-the-art, developed from many years of evolution.

All these outdoor fireplaces can be supplied for use on natural gas (NG) from the house, propane gas (LPG) cylinders or even bioethanol liquid fuel. Your choice.

Our gas models come with full electronic handheld remote control or can be operated by a home automation system.

This brochure will offer a flavour of our abilities, but there are many, many more examples to be found on our website.

ASTRA FIREBOWL

Beyond the Flame

Astra firebowl is handmade from polished or industrial reinforced concrete, so strong that we can make it thinner than you might imagine, for maximum aesthetic effect.

Due to the nature of the process, no two firebowls will look exactly the same.

And there are choices, of course. Six colours, of gas type (mains gas or LPG cylinders), of operation - on bioethanol liquid fuel - and a choice of pebble colours, too.

BENNO FIREPIT

Beyond the Flame

Benno has a square fuel bed and the option of ceramic pebbles (shown with mixed colours here) and of course is made from our finest reinforced polished concrete.

Benno offers ignition by handheld remote control and also can be controlled by your home automation program.

There is a choice of six colours and of mains gas, LPG or bioethanol liquid fuel operation.

CODY FIREPIT

Beyond the Flame

The unique Cody circular gas burner will differentiate from other styles and it will sit proudly in the entertaining area of your home.

Not only do our burners create the best flames, Cody has handheld remote control - and can even be controlled by your home automation program.

There is a choice of six modern concrete colours and of gas and pebble type, too.

DAKOTA FIREPITS

Beyond the Flame

We named our range of linear firepits Dakota. In three widths, any one of them will enhance your deck - with enough surface space for your glass of wine or BBQ meal.

Not only do our innovative gas burners create the best flames, the Dakota range has handheld remote control and can even be controlled by a home automation program.

And more, there's a choice of six stunning colours and ceramic pebbles to suit your style.

To the beach

BESPOKE FIREPITS

Beyond the Flame

We often work with designers who have already developed a firepit style for your project.

Alternatively, we can create a design in stone or porcelain, polished concrete, painted metal or Corten steel. Or it may be that you just want a gas or bioethanol burner suitable for outdoors.

Send your drawings or visuals by email and we'll react with detailed site-specific technical information and a fair quotation.

FIRETABLES

Beyond the Flame

Our stunning firetables are made-to-measure. They are not more expensive, but you will have a choice of materials, colours and dimensions.

Your contractor may even be able to build some of the component parts, which may reduce your costs further.

On sight of your drawings or visuals we'll be pleased offer a competitive quotation to supply or install one of our fabulous firetable creations.

WALL FIRES

Beyond the Flame

Working with your preferred designer or contractor, we make outdoor fireplaces to your size and in your style.

Gas, woodburning or bioethanol, we use our innovative Signature gas burners to best advantage in a bespoke firebox.

There are examples on our website, just too numerous to publish here. Send your drawing or visual and be sure we will provide you with our best flame.

MORE WALL FIRES

Beyond the Flame

The choice of styles may surprise you. Our bespoke fireboxes can be made from black, weathercoated galvanised steel, brushed stainless steel, or our lifetime guaranteed marine-grade stainless steel.

Optionally, we can line the inside with black mirror glass or a wide range of decorative porcelain sheet, or even amazing 3D carved stone tablets using 5-axis machining.

As you can see from this amazing one-off, if you can imagine it, we can make it.

WOODBURNING FIRES

Beyond the Flame

We are proud to be appointed European importers for Escea.

The Escea EW5000 woodburning fireplace is also a barbecue! Available with or without the contemporary fascia.

Yes, you can cook great food on the height-adjustable grille and you can also use the built-in tray to cook on embers or charcoal.

The EW5000 is the only one of our outside fireplaces which needs a chimney.

MIX & MATCH YOUR FUEL BED?

Beyond the Flame

We really like your style! So, of course, we offer the widest options for the fuel bed. Our Black Crystalight gas media is made from ceramic glass (below centre) and is the standard fuel bed with every gas fire. There are also White and Clear options.

Then, if you wish, you can add from our new range of High Definition ceramic pebbles.

With our Wall Fire outside fireplaces you can also add High Definition ceramic logs.

CERAMIC PEBBLES

Our latest range of HIGH DEFINITION pebbles.

More variation in size, shape and texture. It's your choice.

Approx 24 in a bag, sizes from 40mm-80mm length/diameter.

MORE PRODUCTS

Beyond the Flame

Trust Urban Fires to be able to complete your outdoor project to the highest standards, with our outdoor cooking facilities.

We can bespoke outdoor kitchens to your design, work with your designer, or create something special just for you.

We also know that many of you love to cook on wood, so we can offer a very specialised range of woodburning products for the most ardent chef. Professional versions, too!

BESPOKE OUTDOOR KITCHENS
